

BYOD Charging Locker

Zioxi BYOD Charging Locker

The 8 locker compartments are accessed via individual code based digital locks. Each user chooses their own 4 digit code, and enters the code twice to lock the door, then once to re-open. The next user repeats the process, so each locker compartment can be used by different people throughout the day. There's a programmable option dedicated locker use by single users and master codes for if codes are forgotten. Also available with key locks.

The **zioxi** BYOD Charging Locker provides mains power sockets in each locker compartment using industrial quality power distribution modules. Users plug in and store the power adapters in the same compartment as their device, so any device can be charged. The lockers are compact, stackable and suitable for Laptops (up to 15.6" screen sizes), iPads, tablets and most mobile devices.

CHLC-BYL-08	BYOD Charging Locker for 8 Laptops or Tablets with mains power sockets and code locks	72h x 42w x 53d (cm)
