## Washable, Portable, Medical Grade

### *Keyboards Designed for Modern Medical Environments*

Healthcare-associated infections (HAIs) can be economically staggering for a hospital when you multiply the additional costs the hospital incurs when a patient contracts an infection (\$15,275) by the estimated 2 million infections per year. According to a recent study by the Centers for Disease Control and Prevention, the cost of HAIs has exceeded \$30 billion annually.

Washable keyboards are as necessary as hand washing to prevent cross-contamination in medical applications. With the latest technology, iKey® offers fully sealed, medical grade keyboards with the added benefits of portability and quick cleanability for today's medical environments.

Sealed to NEMA 4X/IP65 specifications (water-proof), iKey's medical products can easily be disinfected using hospital-grade cleaning agents numerous times a day or as specified in your hospital's cleaning protocol.

In addition, on select models, wireless technology provides users mobility for use in operating rooms, intensive care units, patient rooms, carts, and retractable workstations.

In clinical environments where down time due to frequent failure is not an option, iKey provides a worry-free solution so that valuable time can be used where it's needed most — taking care of patients.

## BT-80-TP

- Bluetooth®-compatible
- Industrial silicone rubber keypad
- ABS polycarbonate case
- Red LED backlighting
- VESA mount pattern

## SBW-97-TP

- Rechargeable, wireless keyboard
- Integrated touchpad with left and right click buttons
- Built-in mounting holes
- CleanLock™ key
- Compatible with hospital cleaning agents

## SB-97-TP

- Green LED backlit keys
- Compatible with hospital-grade disinfectants
- Fully sealed ABS polycarbonate case
- Integrated touchpad

## SLK-97-TP

- Red LED backlit keys
- Cleanable, liquidproof design
- Integrated touchpad with left and right click buttons
- Fully sealed keyboard
- Compatible with all hospital-approved disinfectants

## SLK-102-TP-FL

- Cleanable, liquidproof design
- Integrated GlidePoint™ touchpad
- Red LED backlit keys
- Industrial silicone keypad and low-profile keys

## DT-OM-FL

- Liquidproof pointing device
- ABS polycarbonate case and industrial silicone overlay
- Ergonomic design
- disinfected using any hospital cleaning agent
