

Military Keyboards

Mobile, Durable, Secure

Rugged Military Keyboards Engineered to Meet Your Needs

Keyboards used in military applications must be rugged enough to stand up to constant usage and extremely harsh conditions. For more than 25 years, iKey® has understood the varied needs of its customers and has designed and built a full line of durable keyboards that meet a wide range of military demands, including those found in mobile and outdoor environments.

Having worked with military installations around the world, iKey is skilled at accommodating the unique demands of military customers and has the engineering expertise to create the customized products our customers need. iKey understands that in the military, the most important demands are mobility and durability. Available in waterproof and wireless models, iKey can customize a solution for key functionality, pointing devices, mounting holes, cable connectors and more.

iKey's military keyboards have excellent EMI and ESD performance characteristics, including 200volts/meter, 25 kV ESD, and MIL-STD-461-RS103.

Sealed to NEMA 4X/IP67 specifications, iKey's military keyboards resist dust, dirt and water. iKey's sealed peripherals can easily be cleaned to ensure effective operation.

In addition to being rugged and resistant to environmental contaminants, iKey's keyboards are available with the convenience of multiple LED backlight colors, including NVIS-compatible options, to ensure effective operability day or night.

In military applications where hardware failure is not an option, iKey provides a trouble-free solution to meet your needs.

SLK-880-FSR

- Adjustable green backlighting
- Optional night vision (NVIS) compatible configuration
- Integrated Force Sensing Resistor (FSR)
- Cable strain relief exceeds 25 pound pull limits
- NEMA 4X and IP68 specifications
- USB 2.0 hub integrated directly into case (SLK-880-FSR-USB-H)

SL-86-911-461

- 461E military standard approved
- Green backlit keys
- Integrated Force Sensing Resistor
- One-touch blackout key
- Mounting holes

AK-39

- Wearable keyboard
- Snap-on faceplate
- Integrated Force Sensing Resistor (FSR)
- Six levels of adjustable green LED backlighting
- Optional night vision (NVIS) compatible configuration

SLP-88-461

- 461F military standard approved
- Integrated backlighting
- ABS polycarbonate case with 8-32 mounting studs
- Sealed to NEMA 4X specifications

DBL-810-TB

- Integrated 25-mm laser trackball
- Green LED backlight
- Industrial silicone rubber pad with stainless steel case
- NEMA 4X specifications

DBL-81

- Green LED backlight
- Stainless steel case
- 12 function keys
- NEMA 4X specifications
